

Bureau of Epidemiology Radon Program

4052 Bald Cypress Way, Bin #A12
Tallahassee, FL 32399-1720
Phone: 1 (800) 543-8279

Businesses and individuals providing radon mitigation services in Florida must be certified by the Florida Department of Health. The installation of a mitigation system must be supervised by a Florida certified mitigation specialist. A radon mitigation business must provide:

- 1) **mitigation system labels,**
- 2) **a visual or audible device to automatically indicate system failure,**
- 3) **soil gas exhaust vents above the eave of the roof for active soil depressurization systems**
- 4) **written instructions on the operation and maintenance of the system,**
- 5) **post mitigation testing by a FL certified radon measurement business, and**
- 6) **if installing an engineered system, an engineer or mechanical contractor sign off on design as appropriate.**

The department recommends you review these requirements with the mitigation contractor before entering into a contract. If you have any questions about the radon businesses listed below or your radon mitigation system, call this office at the above number. This list may include businesses with expired certifications. While Florida Statutes require that businesses be certified to provide radon professional services, we have included recently expired businesses as they may be in the certification process and their certificate may have been issued since this report was published. Contact the certified business or the department to check on the certification status of any business listed with an expired certification.
